37.0%	\$0.95
Pro-Rated \$0.01 per 0.10%	

- Forward Contracting and Targets Orders accepted.
- Premium is over cash price delivered to Cortland, OH.
- Premium based on protein and Non-GMO test results.
- Protein levels based on dry matter protein, which is at zero percent moisture. Many varieties are rated based on 13.0% moisture, which is easily converted to dry matter protein with a math calculation.
- Protein can vary between Non-GMO Conventional varieties; we can test any untreated seed to give you an idea of projected protein level.
- Protein can be affected by growing season, protein information can be obtained from seed suppliers that is provided by the soybean breeder.
- Any clear or dark hilum Non-GMO Conventional variety.
- Transportation available, call for quotes.
- Delivery will be scheduled and based on pricing time frame by grower.

This program is in addition to Schwartz Farns LLC Foodgrade program and is not variety specific. In the future, we will have a list of conventional varieties that have a higher protein level.
